

A Small Paper Built from Retrieved Docs

Ada Example · Bob Example

Local-first document tooling

Abstract. This starter demonstrates a two-column academic paper with a figure, citation, and bibliography.

Introduction

This template keeps the styling small and leaves the paper content plain. It is intended as a companion artifact for TypstRAG, not as a full journal class.

Readable technical writing benefits from small source files and reproducible tooling (Knuth, 1984).

Method

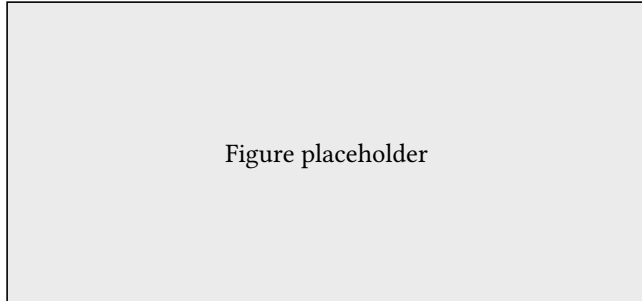

Figure 1: A placeholder figure with a caption.

Figure Figure 1 shows where a generated or measured result can go.

Conclusion

Use this template as a starting point, then delete anything your paper does not need.

Bibliography

Knuth, D. E. (1984). *The TeXbook*. Addison-Wesley.
